DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Hinson on September 28, 2005.

The application has been amended as follows:

a. In line 6 of claim 1, line 8 of claim 4, line 7 of claim 7, and line 9 of claim 10, the phrase "comprising at least function," has been changed to "comprising at least one function".

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The amended claims feature the identification of a SLEE service component that is registered in the SLEE to be received, such that the component is configured to perform the detection and posting of administrative information to an event handler, reloading, unloading, and halting and resuming service execution, all within the SLEE. This service component is then controlled corresponding to its configured duties through a hypermedia document, wherein a SLEE compatible event is

created, which is then routed to the event handler of the SLEE, which then causes the service component to execute the administrative command. In general, a SLEE is a generic execution module, without the claimed components of the detection and posting of administrative information, reloading, unloading, halting execution, and resuming execution, in addition to being able to support a service component. Because the SLEE module is configured to have the capability of these features, it is believed that the claimed invention is novel. The examiner was unable to procure prior teachings of such features as claimed, and could not render said features obvious to one of ordinary skill in the art, without the use of impermissible hindsight constructions, especially in view of applicant's use of the term "consisting". It is therefore the examiner's belief that the claimed invention does indeed possess novelty.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
